

RMC Donates For Konkan Floods Victims.....

We have observed heavy rainfall in Maharashtra (530mm), a hill station in satara district, and also in mahad (383mm) and poladpur town (575mm) led to the destructive flood in the konkan regions raigad district. The death of Maharashtra due to last week's heavy rain reached 213 on Wednesday with more than 90 casualties, are again facing the risk of landslides Raigad is the worst affected district

and more than 100 villages there are again facing the risk of landslides.

And for such destruction, NSS Cell of Reena Mehta College in collaboration with Mumbai University had organized an event in the college premises for the Konkan flood relief drive in order to help the needy families and children of the flood-affected by donating them with daily food and other essentials. The donation

drive took place on 27th July, 2021 from morning 8 am to 2pm. Teaching & Non-Teaching staff members of the college collected cash Rs of 15,500 and as well as food

grains such as Rice, Pulses, salt, spices, biscuits, soaps, and food grains were brought under the supervision of Principal Ma'am.

Lastly the Vote of thanks was given by Mrs. Vaishali Kothiyal ma’am.

COVID 19, An alternative Perspective

Come March 2020 and the world was introduced to a scary subject called COVID 19 which was capable of killing millions, destroying economies & families & rendering billion job less around the world. It made the GDP growth chart

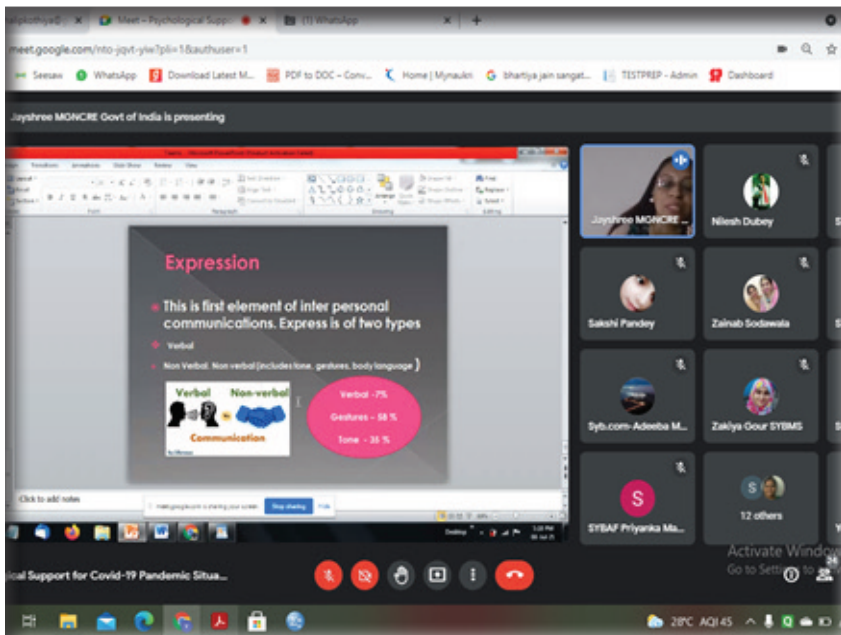

.developed and promising economies rose dive to an alltime low. It challenged the progresses made by the medical science and the medical infrastructure created by the most developed countries. .The most common sight in every country

be ,it a first world or a third world country, was patients queuing for hospital beds & a team of doctors and paramedicos not knowing how to handle them . The percentage of death was high , in every country ,due to scarcity of ICU

beds in hospitals & no researched ,developed & established line of treatment to this new virus called COVID 19.

RMC Organizes Webinar on Psychological Support for Covid-19 Situation

On 08th July 2021, The NSS Unit of Reena Mehta College Conducted an online workshop on “Psychological Support for Covid – 19 Pandemic Situation” (COVID helper’s skill for student community) on the Google Meet platform from 4 pm to 5:30 pm, in collaboration with Mahatma Gandhi National Council for Rural Education (MGNCRE), Ministry of Education, Government of India. Father, Mrs. Jayshree Siddharth Jani was the Resource person of the workshop. More than 35 participants were participated include students, program officers, and college faculty. The experience was so good and students got knowledge

of how to Mentally prepare themselves and also help others- by work with N.G.O in Pandemic Situation. Psychology is considered to be one of the important branch of Social Science. Over a period of time, the concept to psychology has got a new meaning all together. The major change that took place was during the Covid -19 situation. The impact of Psychology of an individual has gone into the task during the covid-19. Lastly the webinar ended with the Question and answer session from the spokesperson and as well as students. Lastly the thanks given was given by our faculty Mr. Nilesh Dubey and ended the session on a positive note.

Cryptocurrency, a game changer for Inadian Economics in Nearer Future!!!!!!!!!!!!!!

In today’s scenario there has been a lot of talk about cryptocurrency, People from various strata are commenting on its acceptance and non-acceptance as a formal medium of payment. Even country like El Salvador becoming first countries to accept Bitcoin as a legal tender of exchange, while other developed nations like USA, Canada, Australia and European Union have shown a positive sign towards the cryptos. Elon Musk, tweeting about the same. But the real question lies that what are all these cryptocurrencies about? Are they safe to invest? First let’s understand the meaning of cryptocurrency, A cryptocurrency is a digital or virtual currency that is secured

by cryptography, which makes it nearly impossible to counterfeit or double-spend. Many cryptocurrencies are decentralized networks based on blockchain technology—a distributed ledger enforced by a disparate network of computers. Indian crypto market has some reason to celebrate as RBI (Reserve Bank of India) suggests that they may not have a complete ban and instead, the government may only look to regulate cryptocurrencies. One of the biggest disadvantage of cryptocurrency is that it is not a regulated currency.
